

Fridge & Freezer Recycling

Why? That old, working refrigerator or freezer in your basement or garage may be costing you **up to \$110** per year in electricity.

Retire your old, working refrigerator or freezer through the ComEd Energy Efficiency Program. We'll pick it up for **FREE** and send you **\$50**. The units are responsibly recycled, which reduces the amount of solid landfill waste and prevents harmful oils and refrigerants. We'll also take an old, working room air conditioner and dehumidifiers when we pick up your fridge or freezer – and send you an additional **\$10**.

How it works: Your refrigerator or freezer must be between 10 and 30 cubic feet (interior) in size - typical for most residential refrigerators and freezers, empty, defrosted, and working at the time of pickup.

Get started: Make an appointment. [Schedule online](#) or call 855-433-2700 from 8 am - 5 pm Monday through Friday, 8 am - 4 pm on Saturday. Visit ComEd.com/FridgeRecycling for more details.

Tip Details

Save up to \$110 per year, ComEd will send you \$50 and you'll help the environment

Offers and Incentives: Spread the word to other ComEd customers. Let your friends and family know about ComEd's Fridge & Freezer Recycling and help us make Northern Illinois a better place to live!
